Total Hours for Month: _____

Note: For drivers to be exempt from completing a logbook, the driver must: 1) start and finish the work shift at the same location; 2) must not exceed a 160 km driving radius (as the crow flies); 3) must not exceed 15 hours on duty time per work shift; and 4) must record the date, start and finish times. If any of these conditions are not met, the driver must complete a daily log for that date. The driver must record all non-driving hours he/she conducts on behalf of the carrier, identifying all days off. The driver requires 8 consecutive hours off duty prior to starting a new work shift.
